

IVO SOKOLOSKI

Dedicated Computer Science and Engineering student with a strong focus on Software Engineering and Data Science. I bridge the gap between building robust full-stack applications and developing advanced AI/Machine Learning solutions.

Driven by curiosity and technical precision, I actively document my progress through projects on GitHub, ranging from web-based systems to deep learning models. I am a versatile fast-learner, eager to apply my broad skill set in Full-stack Development and Machine Learning to solve real-world challenges and contribute to innovative tech teams.

TECHNICAL SKILLS

Programming:

C++, Java, C#, JavaScript, TypeScript, Bash, Python

Web Technologies:

HTML, CSS, .NET MVC, Vanilla JS, React Fetch API, jQuery, anime.js, WordPress

Backend & Frameworks:

Spring Boot, Spring MVC, Spring Security, ASP.NET MVC, Django

Databases:

PostgreSQL, Local DB / SQL

Data Science & Machine Learning

PyTorch, Scikit-learn, Pandas, NumPy, Matplotlib, Seaborn, RAG, Agentic RAG, Transformers, CNN, LSTM

EDUCATION

Faculty of Computer Science and Engineering (FINKI)

- **Major:** Applied Information Technology (AIT)
- **Year of Study:** Third Year

SKILLS

- Adaptability and teamwork
- Commitment and responsibility toward tasks
- Desire for continuous learning and improvement

PROJECTS

- **CarsApp** — Spring Boot application with MVC architecture, PostgreSQL database, authentication and authorization with Spring Security, and email verification. <https://github.com/ivosokoloski/CarsApp>
- **Vaccination App** — Mini ASP.NET MVC project <https://github.com/ivosokoloski/VaccinationApp>
- **Personal Website** — Portfolio built with React <https://github.com/ivosokoloski/WebPortfolio>
- **MyCocktailsApp** — Web application for searching cocktails using a free API, AJAX, HTML, CSS, and JavaScript. <https://github.com/ivosokoloski/CocktailsApp>
- **Books Shop** — React application with TypeScript and backend Spring Boot <https://github.com/ivosokoloski/books-eshop-frontend>
- **Sportiva Base** - React application with Javascript and backend Django <https://github.com/ivosokoloski/sportiva-base>
- **Data Science Exercises** - Academic exercises, Data Preparation, NLP, Unsupervised Learning, Supervised Learning, Visualization, Bagging & Boosting, Time Series Forecasting <https://github.com/ivosokoloski/DataScienceExercises>

LANGUAGES

- Macedonian (Native)
- English (Fluent)
